### **DETAILED ACTION**

The Preliminary Amendment filed on 09/09/03 has been received and entered.

#### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claims 24-32 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: the connections between the first transistor and the second transistor.
3. Claim 37 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 37 recites the limitation "said second voltage" in line 1. There is insufficient antecedent basis for this limitation in the claim.

#### ***Double Patenting***

4. Claims "24, 25", "26", "27", "28", "29", "30", "31" and "32" are rejected under the judicially created doctrine of obviousness-type double patenting as

Art Unit: 2818

being unpatentable over claims 1-7 and 9, respectively, of U.S. Patent No. 6,650,563. In addition, claims "33, 34", "35, 36, 37", "38", "39", "40", "41", "42", "43", "44", "45", "46" and "47 are also rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 10-18 and 20-22, respectively. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 24-32 and claims 33-47 are anticipated by claims 1-7, 9-18 and 20-22 of the patent.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 24-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Chang et al..

Chang et al. discloses a memory cell (40, Fig. 5) having all the elements as recited in claims 24-31 as follows:

- a first transistor (47, Fig. 5);
- a second transistor (45, Fig. 5) having a second drain node, a second source that is electrically floating (column 5, lines 53-54), and a second gate node that is connected to a bias voltage level (ground).

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yamamoto et al. discloses a non-volatile memory device.

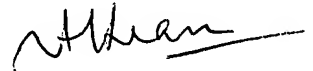

Gotou et al. discloses memory cells and memory devices with storage capacitor of parasitic capacitance.
